Goeun Choi

Product Designer
Ottawa, ON | 613-804-1004 | goeunchoi9090@gmail.com | Portfolio: https://goeunchoi.vercel.app/

Summary

Product designer with a background in UX/UI, web, and visual design, designing and building digital products end to end. Skilled in Figma, visual design, layout, typography, UX principles, and reusable components for design systems. Use AI coding tools (Claude Code) to turn designs into working prototypes, iterating with engineers through user feedback.

Product Design Projects

Collect Jar | Product Design and Development | Oct 2026 – Present

- Designed and built a mobile collection app end to end, from user flows and Figma screens to a working app in React Native and Expo, using Claude Code to move from design to code.
- Created a design system with color tokens, reusable components, and visual states, and used it to build 4 color themes from one shared set of components.
- Ran a two week TestFlight test with 5 testers, then iterated on cutouts, camera framing, and editable details based on their feedback.

BriefBuy | Product Design and Frontend Development | Apr 2026 – May 2026

- Designed an AI ecommerce shopping comparison prototype in four weeks with a data engineer and frontend developer, turning user needs into flows and a Figma design system.
- Built a working prototype with Claude Code, Next.js, and the Claude API, matching the design system in code so the team could test the real experience early.

Experience

Web and Graphic Designer, Canadian Chamber of Commerce, Ottawa, ON | Oct 2024 – Present

- Design web, email, social, ad, and presentation assets in Figma and Adobe Creative Suite, and build web pages in WordPress with HTML, CSS, and JavaScript.
- Applied UX research to BDLNow's interface and data displays for 45 indicators, supporting 16% more product page traffic and 20% higher engagement.
- Maintain reusable components, patterns, and templates for the BDLNow design system, delivering accessible (WCAG) bilingual English and French layouts.
- Create motion design and product communication assets in After Effects and Premiere Pro.
- Collaborated with project managers, data engineers, research, web, and marketing teams to present design rationale, iterate on feedback, and deliver on schedule.

Multimedia Graphic Designer, Richcraft Homes, Ottawa, ON | May 2021 – Mar 2024

- Led Gateway's brand launch across web and print, reaching 4,100+ users with 35% engagement.
- Created social graphics, sales collateral, infographics, and presentations in Photoshop, Illustrator, and InDesign.
- Produced motion graphics and video in After Effects and Premiere Pro for social and web campaigns.
- Maintained 11 WordPress websites using HTML, CSS, and JavaScript, and designed mobile first wireframes Figma.

UI/UX Designer, Pindle (Contract), Remote | May 2022 – Aug 2022

- Designed mobile first website concepts in Figma using user interviews and user journey mapping. Presented design rationale to the CEO and improved NPS by 94% and retention by 18%.

Skills

- **Product Design:** Figma, end-to-end product design, user flows, wireframes, prototyping, interaction design, UI/UX design, UX principles, design systems, reusable components and patterns, responsive design, accessibility (WCAG)
- **Visual Design:** Visual design, typography, layout, visual identity, motion design, Photoshop, Illustrator, InDesign, After Effects, Premiere Pro, motion graphics
- **AI & Development:** AI-assisted design and prototyping, AI coding tools, Claude Code, Claude API, front-end development (HTML, CSS, Next.js, React Native, Expo), working prototypes
- **Research & Collaboration:** User research, user interviews, journey mapping, usability testing, A/B testing, feedback and iteration, stakeholder presentations, cross-functional collaboration, remote collaboration

Education

Diploma in Interactive Media and Design, Algonquin College, Ottawa, ON | Jan 2020 – Jan 2022

Bachelor of International Business, Daejin University, Korea | 2009 – 2014
